

You're invited to share your feedback on the plan for the South West Infant, Child and Adolescent Mental Health Service's (ICAMHS) Acute Care and Response Team

As part of the further development of the service, South West ICAMHS will provide additional acute care response to children who can be safely supported in the community—and we would like to hear from you.

South West ICAMHS offers specialised mental health support to young people and their families who are experiencing moderate to severe mental health problems.
